Achilles Certification

Unique network test solutions designed to allow equipment manufacturers to conduct comprehensive network security and robustness testing throughout the product development lifecycle. Achilles Test Platform provides automated Black Box communication stress, protocol robustness and specific vulnerabilities tests on the most commonly used industrial protocols. Combining Achilles Test Platform in Quality Assurance, Validation and Certification processes along with Achilles Test Software in Development and Design ensures that security is built into your products from the start.

Certificate Of Compliance

This is to certify that the:

Eurotherm EPC 3000 Programmable Controller

Model Numbers: EPC3016; EPC3004; EPC3008

Software Version: V2.xx

Category: Embedded Device

Manufactured by:

Eurotherm by Schneider Electric

Is in compliance with the requirements set forth by:

Achilles Level I Certification

This certificate is restricted to the specified version of the referenced Device (including model number, hardware/firmware/software version, and control protocols) set forth in this Certificate. Any change to the Device might impair the Device's ability to pass the standards referenced in this Certificate. This Certificate is based upon limited testing, and is not a complete or comprehensive certification of the security of the Device. The Device may contain security vulnerabilities and deficiencies that are not covered by the standards referenced in this Certificate. This Certificate is subject to revocation by Wurldtech Security Technologies Inc. More information regarding this Certificate and the Achilles Communications Certification Standard is available at www.wurldtech.com and upon request from Wurldtech Security Technologies Inc.
