IRmobile Vision

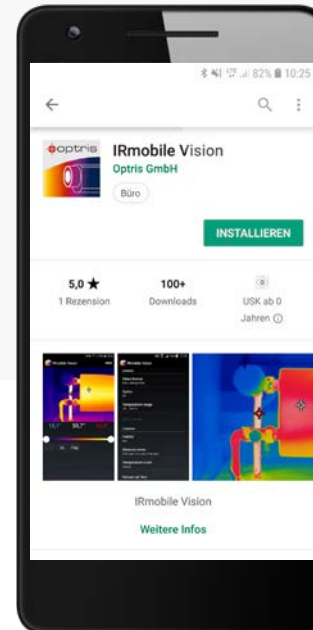

innovative infrared technology

IRmobile Vision

With IRmobile Vision you bring sophisticated thermography into your smartphone or tablet. You can analyze the live IR image stream from your connected camera with auto hot and cold spot detection.

Features

- Live IR image with auto hot and cold spot
- Manual spot meter
- Auto or manual temperature scaling features
- Selectable color palettes
- Adjustable camera features like temperature range and frame rate
- Change of temperature unit Celsius or Fahrenheit
- Snapshot feature
- Integrated simulator

Supported for:

- optris PI and Xi series
- For Android devices running 5.0 or higher with Micro USB or USB-C connector supporting USB-OTG (On The Go)

It is easy to operate:

After you plug your PI or Xi imager via the optional IR App Connector cable to the micro USB or USB-C port of your mobile phone or tablet, the app will start automatically. The IR camera is fully powered by your phone.
