## 604 MODEL

### **Advanced Process Controller/Programmer**

### Ideal for:

- Vacuum heat treatment
- Atmosphere heat treatment
- Creep and tensile testing
- Autoclaves
- Boiler control
- Environmental chambers

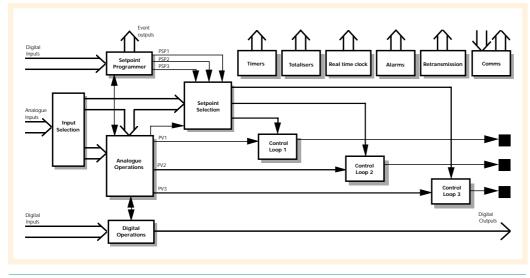

### **Features:**

- 3 Control loops
- SP Programmer
- Customisable user interface
- Maths & logic functions
- Open communications

The 2604 is a highly accurate and stable process controller available in a single, dual or triple loop format. Features include setpoint programming and a comprehensive selection of maths and logic functions.

It has a dual 5 digit display of process value and setpoint with an • Semiconductor diffusion LCD panel for display of alarm messages, programmer and loop status information. User defined messages in the LCD panel simplify operation. It is a highly configurable product offering many features previously found only in programmable logic controllers. This allows systems to be implemented integrating the process control and logic functions of a machine, therefore simplifying system complexity and reducing the total system costs.

> Configuration is achieved either via the front panel interface or using Eurotherm's iTools configuration software.

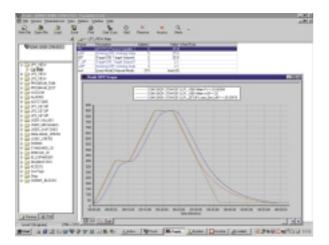

• DATA MANAGEMENT • CONTROLS • PROCESS AUTOMATION •

### **Control Functions**

- 3 Control loops
- PID, VP or ON/OFF
- Cascade, ratio or override
- Gain scheduling
- Configurable control strategies

Eurotherm's advanced control algorithm gives stable straightline control. Automatic tuning simplifies the commissioning procedure by performing a one shot tune to calculate the optimum PID values. To further optimise control especially in programmer applications, gain scheduling can be used to transfer control between up to six sets of PID values.

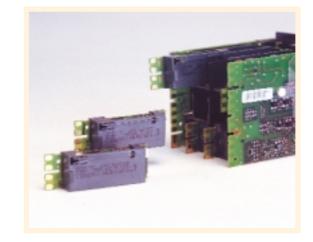

iTools configuration software

### **IO Hardware**

- 0.25uV PV input resolution
- Fixed and modular IO
- 250Vac isolation
- Expandable IO

•

Easily upgraded

The 2604 incorporates a self correcting input circuit (INSTANT ACCURACY) to maximise accuracy and performance during initial warm up and changes in ambient temperature.

One universal and one high level analogue inputs, along with 10 digital IO are included as standard. Additionally, a further 5 IO modules may be fitted providing very flexible input/output combinations. The series 2000IO expander unit can provide a additional 20 digital inputs and 20 digital outputs.

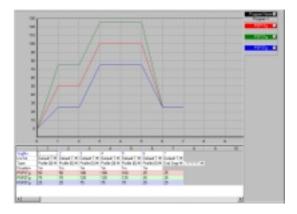

### Setpoint Programmer

- 50 Programs,
- 3 Profiled setpoints/program
- 500 Segments
- 16 Event outputs

Ideal for applications such as atmosphere or vacuum furnaces, and environmental chambers. The 2604 user interface offers the user an extremely easy method of editing, selecting and running programs.

Dual temperature/carbon programmer

### iTools setpoint program editor

- Offline or online editing on PC
- Graphical representation
- Advanced editing functions
- Storage and retrieval of program files

### **Toolkit Functions**

- Mathematical calculations
- Combinational logic
- Real time clock
- Timer functions

### Operators include;

Add, Subtract, Log, Exp, SQRT, AND, OR, Max, Min, Select and many more

ToolKit blocks allows the user to create custom solutions by internally wiring analogue and digital operations together in flexible ways. 24 analogue and 32 digital operations are available. Other functions are available including timers, totalisers and a real time clock.

# Character 1 - Transfer Filter 1 Constant Andre Constant Lago Generative Rest Many Constant Andre Constant Rest Many Constant Rest Constant Rest Many Constant Rest Co

iTools toolkit block editor

### I/O Expander

- 20 Logic inputs
- 20 Relay outputs

The 2000IO expander can increase the digital IO providing the option for greater remote operation of the programmer and expands the 2604 logic capability.

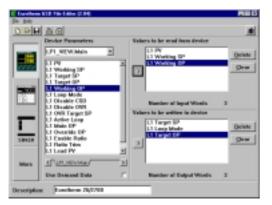

### **Slave Communications**

- Modbus™ RTU
- Profibus® DP
- DeviceNet®
- EI-Bisync

The 2604 supports two slave communication ports. Its modular build provides the user with a selection of communication protocols allowing easy integration into both PLC and PC supervisory systems.

When using Profibus DP a GSD file has to be created, containing the information relating to the instruments parameters, that a Profibus master needs in order to communicate with its slave device. The GSD file for a 2604 is created using Eurotherm's GSD file editor.

**Profibus GSD editor** 

### **Master Communications**

- Modbus Protocol
- 25 read/write parameters
- Expands available hardware
- Interfaces to most Modbus slaves

Master modbus communications significantly increases the applications open to 2604. In its simplest form it can be used to retransmit a setpoint to a number of slave controllers in a multi-zone furnace.

### % Relative Humidity

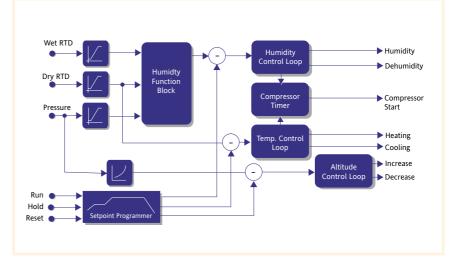

- %RH or Dewpoint Measurement
- Pressure compensation
- Boost heat/cool
- Compressor timer
- Cooling bypass output

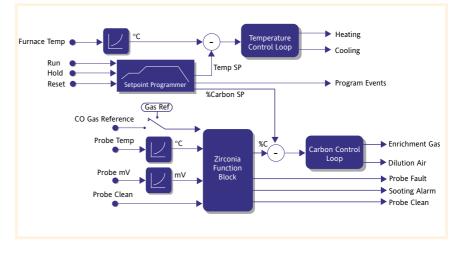

Ideal for use in applications where it is necessary to simulate the environmental conditions of temperature, humidity, altitude or light. The setpoint programmer is used to generate synchronised profiles of up to three variables. Other options allow configuration of signals to turn on a compressor, operate a bypass or operate further stages of heating and cooling.

### **Carbon potential**

- %CP, O2 or Dewpoint Measurement
- CO correction
- Probe burn off and sooting alarm
- Sooting alarm

Ideal for use in gas carburising furnaces where Zirconia probes are used to measure Carbon Potential. A three loop controller can be used to control furnace temperature, carbon potential and quench. The setpoint programmer is used in batch applications to generate synchronised temperature and carbon profiles.

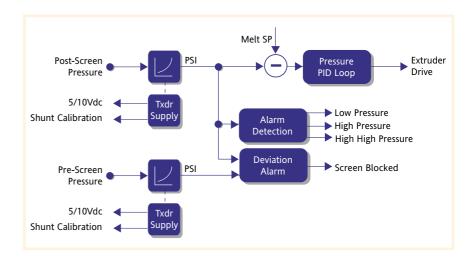

### **Melt Pressure**

- 350Ω Strain gauge input
- Transducer excitation
- Pressure alarms
- Screen blockage alarm
- Simple user calibration with shunt

Suitable for precision pressure control in the plastic extrusion industries. Additionally a second pressure transducer can be used to provide a differential pressure alarm when the screen starts to block. Various machine start up strategies can be used to ensure a smooth transition from auto to manual mode.

Quoted at 0 to 50°C unless otherwise stated. Refer to Engineering Manual for more details

### Control optionsNo. of loops1, 2 or 3 loopsOptionsCascade, Ratio or OverrideModesPID, ON/OFF or Valve PositionApplicationsCarbon Potential, Humidity

### STANDARD I/O

Precision PV Input	
Accuracy	±0.1%
Ranges	mV, mA, volts or RTD (PT100)
Thermocouple types	J,K,L,N,R,S,B,PII,C, plus others
Cold junction	Ext 0°C, 45°C or 50°C

### Analogue input

Allocation	1 fitted	
Accuracy	±0.1%	
Ranges	-10V to 10V or 0 to 20mA	

### Digital I/O

Types	1 digital input
	7 Bi-directional input/outputs
	1 Changeover relay

### MODULES

Digital outputs	
Types	Single relay, dual relay, Single
	Triac, Dual Triac, Single Logic and Triple
	Logic module
Allocation	Slot 1, 3, 4, 5 or 6 (Max 3 Triacs per unit)

### **Digital inputs**

Types	Triple contact input, Triple logic input
Allocation	Slot 1, 3, 4, 5 or 6

### Analogue outputs

Types	DC Control or DC
	Retransmission (5 Max)
Allocation	Slot 1, 3, 4, 5 or 6
Range	0 to 20mA or 0 to 10Vdc

### Dual Analogue outputs

Allocation	Slot 1, 4 or 5
Range	4-20mA or 24Vdc transmitter PSU

### **High Resolution Analogue output**

Allocation	Slot 1, 4 or 5
Range	4-20mA and 24Vdc transmitter PSU

### **Transmitter PSU**

Allocation	Slot 1, 3, 4, 5 or 6
Transmitter	24Vdc @ 20mA

### Transducer supply

Bridge voltage	Software selectable, 5 or 10Vdc
Bridge resistance	300 $\Omega$ to 15Kohms

### Potentiometer input

Potentiometer	resistance 330 $\Omega$	to	150Kohms

### Precision PV input (Module)

Allocation	Slot 3 or 6
Accuracy	±0.1%
Ranges	mV, mA, volts or RTD (PT100)
Thermocouple types	J, K, T, L, N, R, S, B, PII, C, plus others
Cold junction	Ext 0°C, 45°C or 50°C

### Dual (Probe) input

Slot 3 or 6
±0.1%
mV, mA, volts or RTD (PT100)
J, K, T, L, N, R, S, B, PII, C, plus others
Ext 0°C, 45°C or 50°C

### Analogue input (module)

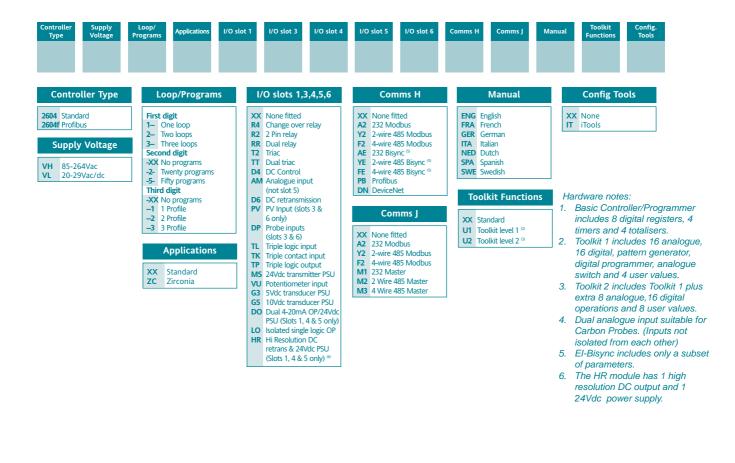

Allocation	Slot 1, 3, 4 or 6
Accuracy	±0.2%
Ranges	mV, mA, volts or RTD (PT100)
Thermocouple types	J, K, T, L, N, R, S, B, PII, C, plus others
Cold junction	Ext 0°C, 45°C, or 50°C

### **Ordering information**

It is only necessary to order the hardware required. Completion of the quick start code opposite will assist you in configuring the 2604. If you require Eurotherm to supply a **fully configured product**, you can use the iTools configuration software to generate a clone file which will be downloaded into the 2604 prior to shipment. Eurotherm will then assign a specific number to your instrument allowing you to easily re-order the same configuration. If you have not previously purchased iTools, please contact your local Eurotherm sales office.

### Example ordering code

2604 - VH - 323 - XX - RR - PV - D4 - TP - PV - A2 - XX - ENG - U1 - IT

This code describes a 3 loop controller with capability to store 20 three profile programs. Supply voltage is 85-264Vac. Modular hardware: 2 x PV input, 1 x Dual relay, 1 x DC control, 1 x Triple logic output, EIA-232 Comms. 16 analogue and 16 digital operations, iTools supplied with controller

### Quick start order code

SVP1 - SPID - SPID - K - Z - A - S1A - 1VH - 2PV - 2HV - 3HC - 3PV

This code configures the hardware specified above:

Loop 1: Valve position control, Type K input, Heat VP output in slot 1,

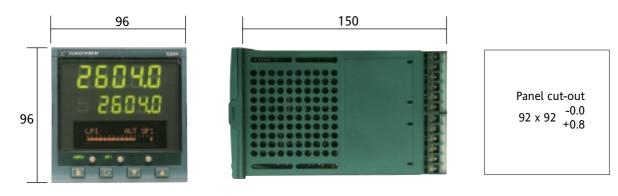

4-20mA remote setpoint input

Loop 2: PID control, RTD input in slot 3, 0-10Vdc Heat output in slot 4.

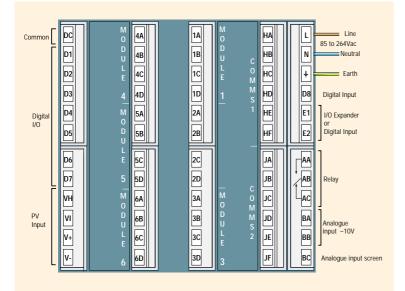

Loop 3: PID control, 4-20mA input in slot 6, Logic heat/cool output in slot 5.
