# **SERV-RITE Wire**

## Thermocouple and Extension Wire

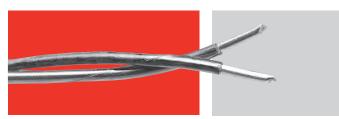

## Polyimide Insulated and Twisted SERIES 511

SERIES 511 is the most economical polyimide taped construction. Polyimide film applied to the conductors is considered to be the ultimate "soft" insulation. The tape maintains its strength at temperatures up to 600°F (315°C). The FEP laminate serves as a moisture barrier and allows the tape to fuse with itself. The finished construction will not unravel when cut.

SERIES 511 conductors are wrapped with the polyimide tape which is fused to itself. Each conductor is color coded with a colored thread under the tape. The insulated conductors are twisted into a duplex construction to eliminate the overall duplex insulation and minimize cost.

### **Performance Capabilities**

- Continuous temperature rating: 600°F (315°C)
- Polyimide fused tape insulation
- Twisted design has no outer jacket
- Colored tracer used to indicate calibration type
- Available with an optional metallic overbraid for additional abrasion resistance

## **Applications**

- Aerospace
- Petrochemical
- Plastics

#### **Specifications**

#### Continuous use temperature

• 600°F (315°C)

#### Single use temperature

• 800°F (430°C)

## **Resistance properties**

Moisture: ExcellentChemical: ExcellentAbrasion: Excellent

## **Popular Constructions**

| Grade        | AWG | Wire Type | Limits of Error | Type K    | Type J    |

Note: FEP laminate melts at approximately 260°C (500°F).

172 WATLOW®

<sup>\* &</sup>quot;S" denotes stranded wire: e.g., "24 S (7/32)" is seven strands of 32 gauge wire to make a 24 gauge stranded conductor.
